

CO5-CLASS ACTIVITY

4Q ; Count no of character and line in the given file.

```
import java.io.*;
```

```
public class Main {
```

```
    public static void main(String[] args) {
```

```
        try {
```

```
            FileWriter fw = new FileWriter("sample.txt");
```

```
            fw.write("Hello World\nJava Programming\nFile  
Handling");
```

```
            fw.close();
```

```
            FileReader fr = new FileReader("sample.txt");
```

```
            int ch, characters = 0, lines = 1;
```

```
            while ((ch = fr.read()) != -1) {
```

```
                characters++;
```

```
                if (ch == '\n')
```

```
                    lines++;
```

```
}
```

```
fr.close();
```

```
System.out.println("Number of characters: " +  
characters);
```

```
System.out.println("Number of lines: " + lines);
```

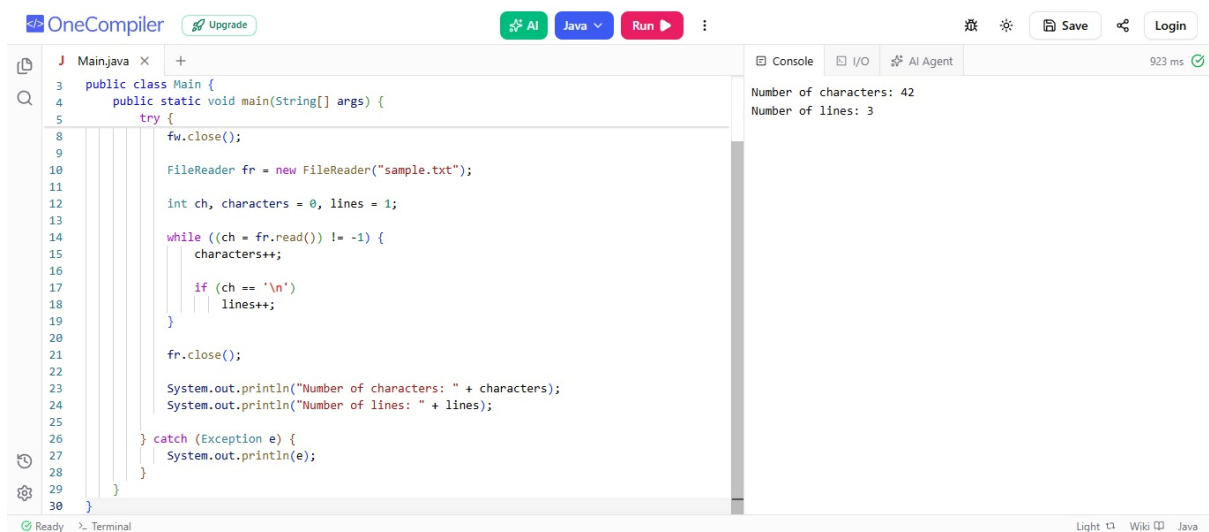

```
} catch (Exception e) {
```

```
System.out.println(e);
```

```
}
```

```
}
```

```
}
```

The screenshot shows the OneCompiler IDE interface. The main editor displays a Java file named 'Main.java' with the following code:

```
3 public class Main {  
4     public static void main(String[] args) {  
5         try {  
8             fr.close();  
9  
10            FileReader fr = new FileReader("sample.txt");  
11  
12            int ch, characters = 0, lines = 1;  
13  
14            while ((ch = fr.read()) != -1) {  
15                characters++;  
16  
17                if (ch == '\n')  
18                    lines++;  
19            }  
20  
21            fr.close();  
22  
23            System.out.println("Number of characters: " + characters);  
24            System.out.println("Number of lines: " + lines);  
25  
26        } catch (Exception e) {  
27            System.out.println(e);  
28        }  
29    }  
30 }
```

The right-hand pane shows the console output:

```
Number of characters: 42  
Number of lines: 3
```

The status bar at the bottom indicates 'Ready' and 'Terminal'.
