

CO5-CLASS ACTIVITY

3Q ; Copy the content from source to destination using
BufferedReader and BufferedWriter

```
import java.io.*;
```

```
public class Main {
```

```
    public static void main(String[] args) throws Exception {
```

```
        String data = "Hello Java\nThis is file handling.";
```

```
        BufferedReader br = new BufferedReader(  
            new StringReader(data));
```

```
        BufferedWriter bw = new BufferedWriter(  
            new StringWriter());
```

```
        String line;
```

```
        while ((line = br.readLine()) != null) {  
            bw.write(line);  
            bw.newLine();  
        }
```

```
bw.flush();
```

```
System.out.println("Content copied successfully!");
```

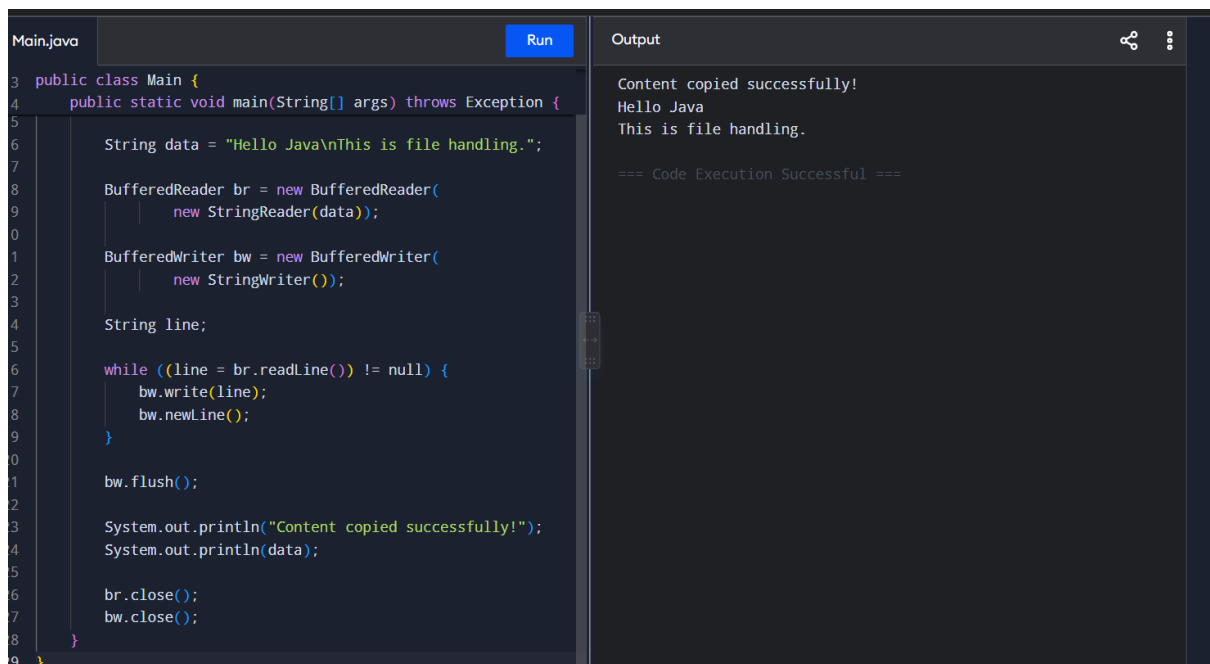

```
System.out.println(data);
```

```
br.close();
```

```
bw.close();
```

```
}
```

```
}
```

The screenshot shows an IDE with a dark theme. On the left, a file named 'Main.java' is open, displaying the following Java code:

```
3 public class Main {
4     public static void main(String[] args) throws Exception {
5
6         String data = "Hello Java\nThis is file handling.";
7
8         BufferedReader br = new BufferedReader(
9             new StringReader(data));
10
11        BufferedWriter bw = new BufferedWriter(
12            new StringWriter());
13
14        String line;
15
16        while ((line = br.readLine()) != null) {
17            bw.write(line);
18            bw.newLine();
19        }
20
21        bw.flush();
22
23        System.out.println("Content copied successfully!");
24        System.out.println(data);
25
26        br.close();
27        bw.close();
28    }
29 }
```

A blue 'Run' button is located above the code editor. On the right, the 'Output' panel shows the execution results:

```
Content copied successfully!
Hello Java
This is file handling.

=== Code Execution Successful ===
```
